In preparation for season three of *Rick and Morty*, Adult Swim has partnered up with different developers and publishers, to bring the show's quirky, dimension-hopping characters to several games. You can find mad scientist Rick and his grandson Morty this summer in games like Rocket League, Move or Die, and Gang Beasts.

You can get Rick and Morty-styled antennas, vehicles, and other customizations for free in Rocket League starting July 5. In Move or Die, you can play as either Birdperson or Mr. Meeseeks. As for Gang Beasts, Rick and Morty themselves become playable characters.

This isn't the first time we've seen Rick and Morty in games. Check out our review for the VR title Rick and Morty Simulator: Virtual Rick-ality by [heading here](#).
